In addition, the needs in color are transformed from sumptuous to low keyed and elegant. The form is simple, objective and substantive, and low design elements are adopted to occupy the large space, which controls people's aesthetic needs for a long period. No style can stay on the stage of fashion permanently. After people experience the taste of coldness and loneliness from simplicity and when people begin pursuing calm, level, detail and discretion, it means that this kind of change emerges. However, after all, simplicity represents modern style. "Nija" series of Audino furniture integrates Italian post-modernism style, advocates blending of tradition and modern.
